

DanMarin A/s

 Part of the Kangamiut Group

– a reliable pelagic partner worldwide

Profile

DanMarin A/S is the pelagic division of Kangamiut Group. Kangamiut Group is a privately owned group of companies founded in 1975.

Kangamiut Group includes subsidiary companies in Denmark, England, France, Greenland, Iceland and Norway ensuring that we keep in touch with all parts of the European and overseas seafood markets.

Kangamiut Seafood A/S, subsidiary of the group, is one of the largest seafood and frozen fish exporters in Europe. The North Atlantic Ocean and Barents Sea are among the company's primary suppliers of fish and shellfish.

DanMarin A/S specializes in pelagic fish from all over the world. Our main markets for pelagic fish include Africa and Middle East. We also farm Tilapia and shrimp in Ghana.

Our experienced team has been dealing with African countries for 20+ years. We continually adapt to the market conditions. We carry a wide range of products and maintain a large number of suppliers and customers worldwide.

Accountability

Danmarin's strategy is based on long term supplies of wild caught fish, seafood and fishfarming. The company continually focuses on sustainability and professional ethics.

In accordance with company code of conduct, we observe all current international quota requirements, as well as EU regulations regarding IUU.

"Profit with Consideration" is our philosophy for long-term profitable business with our suppliers and customers. Danmarin A/S advocates sustainable fishing practices, and we carefully monitor and maintain legality and traceability of our products.

Quality

Product quality is a decisive factor in selling fish and seafood products.

Danmarin A/S provides our customers with fresh frozen high quality fish and seafood products. We work very closely with both our suppliers and customers in order to assure that our products are quality controlled according to customers' standards and requirements.

As part of our focus on quality assurance and traceability, we also offer consulting services with emphasis on process development and optimization.
